THE AMAZONS

Diana was raised by her mother and her aunt in part because only women lived on Themyscira. There were no dads or brothers—no men at all! The women on this island were no ordinary women. They were Amazons. Amazons were larger and stronger than other women. Diana was the strongest Amazon of all.

Working together, the women built beautiful homes and temples. They trained to be tough, skilled fighters so they could protect their island.

Even as a young girl, Diana could swim up a rushing waterfall and carry huge stone columns bigger than a house.
