

Ikon Shield down to eighteen percent.

His modified gauntlets have created an inverse harmonic loop--

--which is cycling down your uniform's protective shield.

When your Ikon Shield collapses, he will CRUSH your zygapophysial joint and you will DIE.

Which begs the question:

What's the point of **HAVING** an artificial intelligence point-defense system if you lack the **NATURAL** intelligence to **USE** it--?

EXPLAIN.

The geriatric male you are attempting to  
assassinate obviously PRE-DATES the INTERNET.

And, possibly, AUTOMOBILES.

ACE  
MASTERSON,  
AGE 82.

GOLD  
WAR-ERA HUMAN  
EXPERIMENTATION. KNOWN  
AS **THE HUMAN  
DYNAMO.**

Ah. "Human  
Dynamo." Very  
scientific.

HE'S  
BEEN INJECTED  
WITH THOUSANDS OF  
MICRO-RECEPTORS--  
LIKE MINIATURE  
BUCKSHOT.

THEY  
ABSORB E.M.  
RADIATION, CHARG-  
ING HIM...ACTING  
LIKE SUPER-  
STEROIDS--

--STRENGTH,  
SPEED,  
STAMINA.

HE  
NEEDS THAT  
**MICRO-WAVE BELT**  
TO REGULATE HIS ENERGY  
AND **MICRO-BANDS**  
TO DISCHARGE  
IT.

Slade...if you're just  
going to **MOCK** me...

By the way: Ikon Shield  
down to eight percent.

Batman is about  
to **KILL** you.

NO,  
HE'S REALLY  
**NOT.**

Perhaps.

However, should your  
Ikon Shield fail, he **WILL**  
crush your trachea--

--causing loss of  
consciousness.

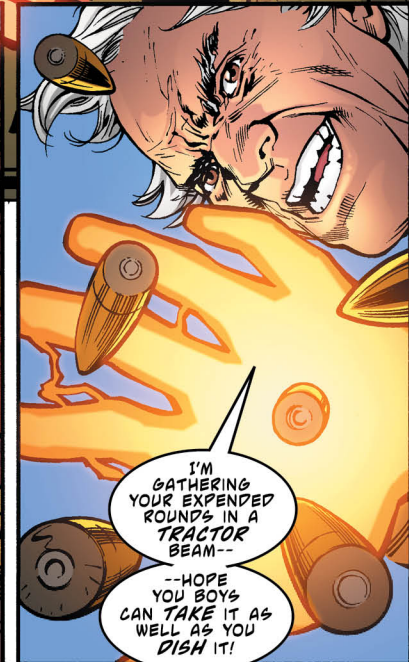

BATMAN  
DOESN'T KILL. HE  
JUST MENACES...  
**POSTURES.**
