BONUS DIGITAL EDITION – DETAILS INSIDE!

Red Room escapee. Hank Pym's daughter.
Super-sciencing for good. Nadia is...

THE UNSTOPPABLE WASP

Born to Hank Pym, the original Ant-Man, and his first wife, Nadia was kidnapped as a child and raised in Russia's Red Room program. By reverse-engineering her father's shrinking Pym Particles, she was able to escape, and traveled to America to begin her life as the brand-new Wasp!

She's been an Avenger and a Champion, but her most important role is as the founder and leader of Genius In action Research Labs, a collective of girl prodigies using science and engineering to change the world!

HEY NADIA, IT'S JANET. I KNOW YOU'RE SUPPOSED TO BE PRACTICING FOR YOUR DRIVER'S TEST WITH JARVIS, BLT...

...I JUST GOT THIS TEXT FROM MOCKINGBIRD, AND I'M ABOUT TO GO INTO A MEETING.

THERE USED TO BE THIS ORGANIZATION CALLED A.I.M. IT STANDS FOR ADVANCED IDEA MECHANICS. BASICALLY, THEY WERE ALL ABOUT EVIL SUPER-SCIENCE.

THEY'RE MOSTLY KNOWN FOR WEARING HAZMAT SUITS AND BLOWING STUFF UP.

FOR A WHILE, SOME AVENGERS HAD TAKEN OVER THE TITLE AND WERE DOING GOOD WORK.

BUT SINCE THAT TEAM OF AVENGERS DOESN'T EXIST ANYMORE, LOTS OF OLD BADDIES HAVE RUSHED TO FILL THE VACUUM.

INCLUDING ONE PARTICULARLY MAD SCIENTIST WHOSE GIANT ROBOT YOU CRASHED.

MONICA RAPPACCINI.

IS THE TANK OUT FRONT? DO YOU HAVE THE DECRYPTION DEVICE FOR THE DIGITAL LOCK?

MONICA RAPPACCINI.
MAD SCIENTIST. ANGRY ENGINEER. FURIOUS (FORMER?) SCIENTIST SUPREME OF A.I.M.

WORD IS SHE'S IN L.A. BUT SHE HAS A NEW LIEUTENANT CONDUCTING A RAID ON A SMALL HORIZON LABS FACILITY. SOMEONE CALLING THEMSELVES "SEEKER."

THE PLACE IS SECURE. I'M RUNNING THE DECRYPTION DEVICE NOW. NO SIGN OF ANY SUPER HEROES.

WE DON'T KNOW WHAT KIND OF FIREPOWER YOU'RE LOOKING AT, BUT IF IT'S MORE THAN YOU CAN HANDLE, CALL ME.

KID? ARE YOU STILL THERE?

OF COURSE, JANET.

SEEKER.
IDENTITY UNKNOWN.

**NADIA VAN DYNE, A.K.A.
THE UNSTOPPABLE WASP.**

GIRL GENIUS. HANK PYM'S
LONG-LOST DAUGHTER.
FOUNDER OF GENIUS IN
ACTION RESEARCH LABS.

EDWIN JARVIS.

AVENGERS BUTLER.
SURROGATE FATHER FIGURE.
TERRIFIED DRIVING COACH.

I NEVER
LEFT.

WHEEE!

*Nadia's Neat
Science Facts:*
I am a Red Room-
trained getaway
driver. Do not try
this at home.

OOPH! MS. NADIA, PLEASE--

SORRY, JARVIS. THAT WAS JAN. IT LOOKS LIKE WE'LL HAVE TO POSTPONE DRIVING PRACTICE.

MORE'S THE PITY. JUST--

The principle force that makes acceleration, braking and steering possible is *friction*. The road and the rolling tires push against each other with equal force in opposite directions.

I'M GOING TO DROP MOCKINGBIRD'S CAR AND YOU OFF AT AVENGERS MANSION, AND THEN I HAVE TO GO STOP SOMETHING CALLED A.I.M.

A.I.M.? I WAS UNDER THE IMPRESS--

JARVIS, WHICH ONE OF THESE IS MY TURN?

With tires, we usually call this force "*traction*." Traction is what keeps the tires and the car moving in the same direction.

WELL, THAT WOULD BE IT THERE, BUT WE'RE MOVING TOO FAST! IF YOU JUST CONTINUE A FEW BLOCKS--

NONSENSE, I CAN MAKE IT NO PROBLEM.

NADIA!

When you turn too quickly for your back wheels to keep up, you lose traction and your car skids. Now you have dynamic friction, and that's much harder to control.

AAAAAAA!

A very dangerous shortcut for causing a skid is pulling the emergency brake.

In most cars this causes the back wheels to stop spinning completely. It can also cause your braking system to fail or your car to roll over.

Seriously, don't try this at home!

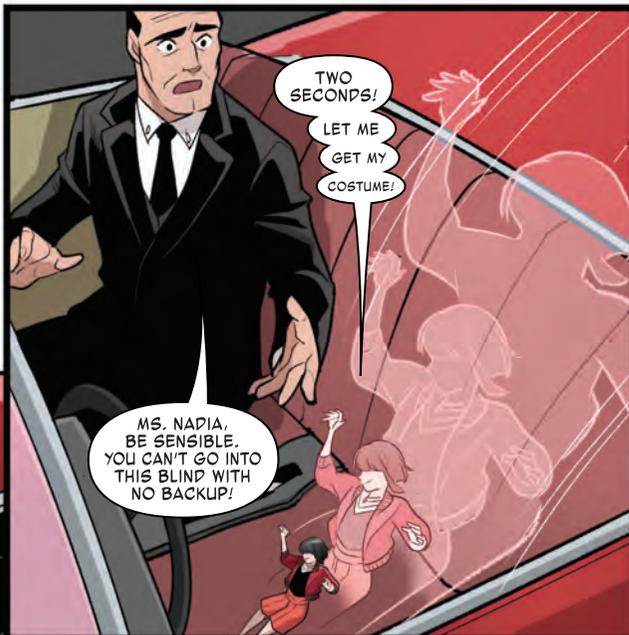

HONK! SCREEECH!

AAAAA!

When you intentionally oversteer to lose friction while maintaining control of the car, that is known as "*drifting*."

This is something that requires training and practice. Really, it's the difference between doing parkour and jumping off buildings.

I've got plenty of backup.

WHOO!
WHOO!

WHOO!
WHOO!

GOT YOU RESET
FROM...HOLD
ON...

NADIA, DID
YOU ACTUALLY SEND
A DISTRESS SIGNAL? I
THOUGHT YOU WERE
PREPARING FOR YOUR
DRIVER'S TEST.

HAD TO
PUT THAT ON
HOLD. WE'VE GOT
A ROBBERY
TO STOP!

IS THIS A
CHAMPIONS
