AVENGERS

NO SURRENDER

The Grandmaster and the Challenger stole the Earth to use as a cosmic playing board, and whoever won should have been granted the title of Grandmaster...but now the game is over. The Grandmaster cheated by planting his daughter among the Avengers as the last hero Voyager, and when his trickery came to light, the Challenger decided to destroy his opponent—and their playing board.

Now the Challenger is on the warpath, but most of the world's heroes and villains are still trapped in the stasis Grandmaster enacted to limit the number of "designated obstacles." While recovering in the med bay, Quicksilver realized that a beacon moving faster than the speed of normal perception was what was keeping them frozen.

If he can catch it, the Avengers will have all the reinforcements they could dream of.

If he can't, Earth is doomed.
