The mass was broadcast live on a local cable channel so we have a clear sequence of events.

At 9:58AM subject detonated an explosive vest that looks like a Palestinian triacetone triperoxide model, but not yet confirmed by forensics.

The initial detonation set off several other pre-planted devices.

And from the timeline, it's clear the subject could not have left those.

So we're looking at a coordinated attack. More than one individual.
