IT'S DONE!

I had to take apart my calculator, cannibalize a couple of my robotics projects, get a power source from the yetis OF ALL PLACES, write an algorithm that could interface everything with my sensors set up around camp...

...PLUS I had to give my desserts to Hes for a WEEK so she'd let me use her watch...

...Thank you for YOURS, by the way April...

--AND after some suggestions from my dads, my Anomalous Temporal Activity Sensor Array--

--MYSTY!

Uh, what?

It's an ACRONYM!

But why? "Anomalous Temporal Activity Sensor Array" already says exactly what it is...

And, strictly speaking, folks don't know what those words MEAN. Except "activity."

Heh, okay...

Jo, for Dolly Parton's sake, why're you up there?!

I want the clearest signal from the sensors!

I can't wait to see what they pick up!

All right, so what's the deal? I don't think I've EVER seen you this pumped up about something!

Yeah, I thought this summer was about taking a break from all the science prodigy stuff?

Well, I guess I wanted a break from all the "planning-my-future" stuff that my dads have been SO excited about lately. Early graduation, scholarships, internships, the best career path...

But being here with all this unexplainable stuff reminded me what I loved about science in the FIRST place!
