Years ago, high school student **MILES MORALES** was bitten by a genetically altered spider and gained incredible arachnid-like abilities: the proportional speed, strength, and agility of a spider, adhesive fingers and toes, the power to direct a bioelectric charge like a sting, to camouflage himself to the point of invisibility, and to detect approaching danger using his precognitive “spider-sense.” He hid these abilities at first, until a hero inspired him to use them to try to make the world more just. **HE IS...**

MILES MORALES: SPIDER-MAN

Miles' mostly normal Saturday spent reconnecting with his uncle Aaron and going to brunch with his parents ended in terror. A faceless blue-skinned teleporter overwhelmed Miles and abducted him. Miles awoke strapped to a table in a high-tech lab, where the emotionless Assessor explored the limits of Spider-Man's powers and his physical and mental strength in ever-more demanding tests. When Miles tried to resist, the Assessor threatened his loved ones. Miles can soldier through any amount of pain to protect his family, but if he doesn't get some help soon, there's no telling what the Assessor's bosses will put him through next.
