HAUNTED

"OUT OF THE SHADOWS"

Thirteen years ago a failed experiment at the Large Hadron Collider in Geneva, Switzerland tore down the barrier between the physical world and the spiritual realm. Ghosts, demons, and many other supernatural creatures once thought to be mythological overran the earth. The entire planet became haunted.

But now physicist ADRIEN MONTAGU and pastor RUPERT WALLINGFORD believe they can reverse the process and close the barrier. After making the treacherous journey from Europe, they have recruited SARAH McCALLISTER to guide them through New York City to one of the few remaining super colliders in the world.

Unwilling to take them at their word alone, Sarah had Adrien and Rupert exorcise a demon possessing her companion STEVE SIMMONS. Using energy based weapons, they successfully expelled a dozen demons from him. But as they begin their journey to New York, they have attracted the attention of the ghostly invaders of their world.
