**ROBERTO DE LA TORRE, AND BEN TEMPLESMITH**

Psiots are individuals with extraordinary abilities of the mind.. However, their powers remain latent unless activated, and if they survive the activation process, there's no guarantee that their new skills will prove useful. That's where The Willows came in; it served as a place where Toyo Harada could send his expensive failures like Nikki, Owen, and their other friends. But after Harada's Harbinger Foundation was exposed, the residents of The Willows were no longer safe. Now they're being hunted by a psiot-hungry predator named Rex-0, and must rely on the guidance of Amanda McKee, aka Livewire. This team of super rejects will have to harness their lackluster abilities in order to survive...

## Amanda McKee

A technopath with interface abilities, Amanda is able to access and communicate with all forms of technology. Previously, she was one of Toyo Harada's most trusted lieutenants, but she broke away from the Harbinger Foundation when the truth of its activities came to light. Having found out about the Willows and the fate of the psiot Harada left behind, Amanda vows to keep them safe, no matter what.

## Nikki Finch

An ornipath and talented gymnast, Nikki has the ability to communicate with birds and uses her athletic skills to defend herself and her friends. She is game for anything and a force to be reckoned with.

## Owen Cho

A conjurer whose activated psiot ability allows him to summon inanimate objects. Unfortunately, Owen cannot control either what he conjures, or when he conjures it.

## Avichal Malakar

Another Harada reject, Avi has struggled to put his life back together after the collapse of the Harbinger foundation. Like his fellow Willows orphans, Avi's ability is far from perfect...

## Rex-0

A mysterious creature hunting the orphans of The Willows, Rex-0 possesses enormous power, but where did he come from, and what does he want with Toyo Harada's rejected psiot?
