**THE EGYPTIAN BOOK OF THE DEAD**  
Spell for Crossing South by the  
Pygones and folk, circa 1079 BC

This compilation of funerary spells and inscriptions for amulets designed to secure the deceased a favorable place in the afterlife was commonly buried in mummies with mummies and amulets.

Re-discovered on an estate in northern California in 1913, this is the finest example of a Book of the Dead known to archaeology. Carbon dating places its creation toward the end of the Middle Dynasty (1600-1350 BC), about the time Heribon, High Priest of Amen, declared himself ruler of Upper Egypt.

This is the book's final American appearance before it is repatriated to the Egyptian Ministry of State for Antiquities.
